FEB 19 1918

Your Forms 30 and 49 show total tons mined in December 1917 as 24255.95 tons.

An abstract of tonnage shown on invoices covering coal sold during December including 133 tons local sales gives 23836.4 tons, plus coal for company use shown on Form 30 as 422.55 tons - gives a total of 24258.95 tons, a difference of 3 tons. The tonnage shown in December reports is 24258.95.

While the difference is slight, your attention is called to it in order that you may make verification if desired, and in order that correct tonnage be taken up on future reports.

Dear Sir:

Replying to your file Form 49 dated the
12th instant:

Our records show that O-WRR&N Lines, 1st Dist.,
was billed with 11566.95 tons of coal during July,
1919, whereas the actual shipments were 11621.35, a
difference of 54.4 tons representing a credit allowed
them by reason of diversion of car UP 20236 to commer-
cial use.

You will note that Form 49 for July, 1919, shows
11566.95 tons shipped to 1st District. We handled this
diversion by taking up 54.4 tons in red against the
1st District, and taking up a like amount in black
against commercial - an offset insofar as Form 49 was
concerned.

If necessary will you please advise further.

Yours truly,

[Signature]
Genl. Superintendent.

Dear Sir:

I am in receipt of your Form 49 for the month of July. Apparently, you have included in your total of coal mined the weight of U.P. Car 20236, 108,800 pounds, which car was diverted from O-W.R.&N. Lines and such diversion covered by your Form 57 1/C dated July 7, 1919. Inasmuch as the tonnage of this car was taken up on Form 57 dated May 27th, it would appear that Form 49 for July is over stated, as I am unable to find that you allowed O-W.R.&N. Lines corresponding credit during the month of July. Please advise.

Yours truly,

Original Signed
L. A. FARQUHAR
