

Tell Activities

Power point!

Videos

Handouts

Relate it to their experience

Personal experiences of leader

Share Activities

You can share a story of your success with the training, and ask students if they have any experience or knowledge of the training already.

Share with a partner or small group

Polls

Think, pair, share

Establish trust in the group so they feel comfortable sharing their stories.

play a sharing game

Audience participation with stories

Inquire Activities

Brainstorming to get everyone involved

Determine individual/community needs

Mind mapping - Here is an easy site to check out for mind mapping (sort of like brainstorming):

<http://www.mindmapping.com/>

What do you hope to learn or accomplish with this training?

Pushback - challenge those hidden assumptions

Webquests - You give students a topic and the web addresses to find the information. Kind of a treasure hunt for information.

Experience Activities

You do, then they do

An exercise where people had to practice having difficult conversations.

Role playing to emulate the experience

Create Activities

I've made students create a human citation machine. I gave them parts of a MLA citation and they had to get in order. I don't think I did the activity very well tho. :-{

In a Library as Publisher class, the best papers were published!

Putting into practice what you have learned.

Just took three days of Excel classes for adults (I was rusty) and we had to do a lot of practical charts and graphs. Most interesting was one for a family budget.

Art/craft supplies to demo what they've learned.

I took a video creation class offered by the National Network of Libraries of Medicine. I made a video!
